

About Visara International

Our Products

Console Devices

- CCA-3074 Console Concentrator
- MCC Master Console Management
- iCON Console Server
- 500-LXP Thin Client Console

Communication Devices

- FEP-4600 Front End Processor
- CNA-8000 Channel Network Appliance
- 1174 family of Communications Servers

Software

- SSL-1000 Security Appliance
- eManager Network Management Program

Storage

- Vi-4990 Virtual Tape System

Printers

- Serial Impact
- Line Matrix
- Laser

Visara International has been creating conventional and customized Enterprise datacenter solutions for over 35 years. Visara prides itself on providing affordable, technically stable solutions for Fortune 1000 companies worldwide. Our vision is clear, our products are leading-edge and our commitment is to our customers. With over 2.5 million devices sold worldwide, Visara is considered among the leading designers and manufacturers of information solutions and systems.

Our Solutions

Visara has focused our efforts and solutions on those companies that either are faced with the dilemma of end-of-life products and/or require a cost-effective migration path to newer technologies. By keeping our finger on the pulse of the market, Visara has introduced new and innovative products for mainframe and midrange master console solutions, front end processors migration, virtual optical and virtual tape storage, communication servers, as well as printers and displays.

To facilitate this transition, Visara provides products such as the FEP-4600 and the Master Console Center for Datacenter Automation. This portfolio of network and systems management solutions are focused around client requirements and with Visara's experience and knowledge, assist companies with:

- Seamless migration of existing "big-iron" networks with LANs and WANs into an enterprise network
- Enhanced security through centralized maintenance and management
- Ways to control cost of operations through hardware consolidation

Over the years, Visara has assisted customers with maximizing value in their legacy equipment investments. We have also kept pace with industry trends by offering innovative network integration solutions when required by our customers. Headquartered in Research Triangle Park in North Carolina, Visara International is a privately held company that leverages its experience with its unique vision for the future.
